

MA SHOWCASE[®]

LIGHTING

It is easy to forget at times that MA offer a wide range of solutions meeting all scales of shows and applications. It isn't just the large format shows and events where grandMA works best, so with this in mind MA Lighting Germany has launched an international campaign offering a staggering 20% discount on the popular grandMA Ultralight, PICO and Micro Consoles as well as on the grandMA NSP – Network Signal Processor. For more product information call your local dealer or Show Technology representative.

20% OFF!*

*Refers to the recommended retail prices

With this temporary price reduction the entry level consoles are more affordable than ever. These smaller consoles are perfect for rental companies, installations, convention centres, theatres and AV companies. *Hurry, offer ends April 30th, 2009.

Never change a winning team. MA have enjoyed a long period of success with the GrandMA. We have been showing some beta consoles to a select group of people for about 5 months now and now we are almost ready for a full launch with dates to be announced very soon. The official launch will be part of our series of open days and will be held across the country. In the meantime you can also visit the microsite at <http://www.grandma2.de>
